Limitation of Liability

1. The content of the Logic Group AG website is carefully selected and kept up to date. If older information is published, the date is given and corresponds to the level of knowledge at the time it was created. Contributions marked with names represent the opinion of the authors, which does not necessarily correspond to the opinion of Logic Group AG.
2. Viewing and reading the website does not result in a contract for a Logic Group AG service between the user and the provider. The information on the website is a courtesy of Logic Group AG for the viewer and is not considered a service. Therefore, Logic Group AG does not guarantee the accuracy, completeness and timeliness of the website content. Anyone who uses the information published on the website does so at their own risk. Logic Group AG's liability for gross negligence and fault according to OR Art. 100 is an exception.

External Links

1. The Logic Group AG website contains links to third-party websites. The respective operator is responsible for the linked websites. Logic Group AG has no influence on the current and future design and on the content of the linked pages. The link does not mean that Logic Group AG agrees with the content of the linked pages in any case.
2. Logic Group AG regularly checks the linked websites for their legality and topicality. However, it is not possible to constantly check the linked websites. Logic Group AG assumes no liability if illegal content appears on one of the linked websites or information that is not up to date. As soon as the Logic Group AG learns of questionable content on the linked website, the link will be removed immediately. Corresponding information is appreciated at Logic Group AG.

Copyrights

1. The content published on the Logic Group AG website is subject to Swiss copyright law. In order to reproduce, edit, translate, store, or reproduce content in databases or other electronic media and systems, you need the written consent of Logic Group AG or the authors named for a particular publication. Quotes are allowed without permission if the source is named.
2. Written consent must also be obtained for a link to the Logic Group AG website.
3. Copies or downloads for private use are permitted without consent.
4. Who wants to use the content or other information, e.g. in the imprint, for advertising, has to get a written permission. Otherwise, such use of the Logic Group AG website is expressly prohibited.

Data Protection and Data Safety

1. Logic Group AG of course observes the regulations on data protection, namely the data protection law and the associated regulations.
2. Logic Group AG undertakes to provide security according to the current technical status in systems, programs etc. on which it has influence.
3. The users of the website and the customers are aware that errors can creep in even with careful software development and maintenance, so that Logic Group AG cannot vouch for 100% availability of the website or the service.
4. The readers of the website and the customers of Logic Group AG have to ensure the security of the systems, programs and data that are within their sphere of influence. In their own interest, customers should keep passwords and user names secret from third parties, change passwords at regular intervals if necessary and design them in such a way that they cannot be easily determined, see also General Terms and Conditions. Logic Group AG informs customers about security measures that they have to take themselves.
5. The customers undertake not to cause undue or improper distribution of the platform provided on the website, in particular spam mailings. This is also specified for the customers in the general terms and conditions.
6. Logic Group AG is not liable for defects and malfunctions for which it is not responsible, especially not for security defects and operational failures of third-party companies with whom it works or on which it is dependent.
7. Furthermore, Logic Group AG is not liable for force majeure, improper handling and disregard of risks on the part of users or third parties, excessive use, unsuitable equipment of users or third parties, extreme environmental influences, user interference or interference by third parties (viruses, Worms etc.) that happen despite the necessary current safety precautions.
8. By visiting the website of the provider, statistical information about the access such as date, time or the page viewed is stored. This data is not personal data, but is anonymized. They are evaluated for statistical purposes only. The relevant data is evaluated within Logic Group AG, but not passed on.
9. Logic Group AG can process the data of website users or customers if it is necessary to identify and stop fraudulently provided information as well as illegal or contractual use, abuse or damage to Logic Group AG or the website. For this purpose, Logic Group AG may also determine and process usage data, among other things with the help of cookies, in order to find out from the total inventory of all current information those for which there are actual indications of misuse. Logic Group AG can transmit this data to law enforcement authorities and third parties violating their rights.
